

A Broad Range of Thin-Film Capabilities for a Wide Variety of Applications

Newport offers a wide range of optical filter and thin-film capabilities for the photonics industry. Newport's Franklin facility has been supplying quality Corion® brand optical filters since 1967. We supply optical filters to OEM manufacturers of instruments such as DNA analyzers, laser rangefinders, environmental monitors, clinical chemistry analyzers and many more. Our products include bandpass, calibration, dichroic, edge, fluorescence, neutral density, and notch filters, as well as beamsplitters, anti-reflection, conformal, and gain-equalization coatings. We offer catalog versions of most of these products.

Optical Filter Product Categories

Neutral Density Filters	Bandpass Filters	Edge Filters	Dichroic Filters
Diffusers	Colored Glass Filters	Fluorescence Filters	Calibration Filters
